THE SWITCH

Part of the BEMAC Group

- » Manufactures wind power generators
- » Based on LUT's high-speed technology research
 - LUT's spin-off Rotatek merged with two other companies
- » Expanded into marine technology

Danfoss – Engineering Tomorrow

At Danfoss, we are engineering solutions that allows the world to use resources in smarter ways. Driving the sustainable transformation of tomorrow.

[Read how we are Engineering Tomorrow](#)

DANFOSS EDITRON

- » Specialised in sophisticated electric drivetrain systems
- » Originally an LUT spin-off called Visedo
 - Visedo was based on LUT's strong energy research
- » A unique permanent magnet technology enables hybrid and electric applications for marine, off-highway and commercial transport
 - The aim is to produce power with less fuel and emissions

SOLEIN[®] PURE PROTEIN MAGIC

Introducing Solar Foods' spellbinding invention Solein – the purest protein in the world.

[About Solein »](#)

- 
- » Produces a new type of protein with air and solar electricity – without agriculture and the use of arable land
 - Main raw materials: carbon dioxide and green hydrogen produced with electricity from renewable sources
 - The end product can replace meat and provide a growth medium for meat substitutes
 - » Collaborates with the European Space Agency (ESA) in developing a novel food production concept for Mars.
